of Exeter

COURSEWORK SPECIFICATION

ECM1416 - Computational Mathematics

Module Leader: **Tinkle Chugh**

Academic Year: 2025/26

Title: ***Coursework***

Submission deadline: ***17th February, 2026***

This assessment contributes 30% of the total module mark and assesses the following **intended learning outcomes**:

- ILOs assessed by this piece of work - 1. Show understanding of linear algebra, probabilities and numerical optimization 2. Display competence in using these mathematical tools 3. Design algorithms implementing these mathematical methods 4. Apply the techniques in practical programming context 5. Show understanding of a range of mathematical methods used in computer science 6. Apply mathematical techniques to computer science problems 7. Solve problems using the appropriate mathematical tools 8. Adapt existing mathematical knowledge to learning new methods

This is **an individual** assessment and you are reminded of the University's Regulations on Collaboration and Plagiarism. You must avoid plagiarism, collusion and any academic misconduct behaviours. Further details about Academic Honesty and Plagiarism can be found at <https://ele.exeter.ac.uk/course/view.php?id=1957>.

Generative AI

This assessment has been categorised as **AI-Assisted**. You can find further information in the University's policies around using AI in assessed work.

Permitted use of AI in the assessment:

- To develop ideas
- To assist with research or information gathering
- To help you understand key concepts and theories
- To identify trends and themes as part of data analysis
- To provide feedback on a draft
- To improve the plan or structure of my assessment

- To identify trends and themes as part of data analysis
- To generate images, figures or diagrams
- To proofread and correct spelling or grammar errors
- To format citations or references
- OTHER (please state)

When submitting your assessment, you must:

1. Treat the AI tool like a citation from any other source.
2. Include a list of all AI prompts and hyperlinks to their output with your references, at the end of your work. You do not need to include the outputs themselves, just the links.
3. Retain the full outputs generated by the prompts you have used during your assignment. These outputs should be accessible at the hyperlinks which you have submitted with your assignment. You may be asked to produce this material in the event of an academic conduct inquiry.

Instructions and Submission Format

Please check the attached Jupyter notebook for the necessary details about coursework submission.
